

Help shape accessible technology: Take part in a University of Surrey research study

Are you a person who is blind or visually impaired and aged 14 years or over? Would you like to help design a more accessible chatbot-based survey?

The University of Surrey is inviting you to take part in a research project to make online surveys more accessible for blind and visually impaired users.

What's involved:

1. **Consent call** – We'll arrange a short phone or video call to go over the study and answer any questions.
2. **Online survey** – You'll then receive a link to complete a short survey online, using your preferred assistive technology.
3. **One-to-one interview** – We'll talk about your experience completing the survey, and I'll ask a few extra questions in a relaxed online conversation.
4. **Group workshop** – Finally, you'll be invited to join a small online workshop with others to share ideas and help shape accessible design solutions.

Interested?

Register [here](#) to take part and I'll send you the detailed study information and a consent form in an accessible format.

This research has been reviewed by the University of Surrey Ethics Committee and given a favourable ethical opinion (reference 1176).
